

Christopher P. Shaw, CIH

Current Employer or Company Information

January 2018 – Present

Industrial Hygiene Project Manager • Apex Companies, LLC

Christopher P. Shaw is a Certified Industrial Hygienist (ABIH CP# 11219) whose environmental consulting experience includes projects conducted throughout the country for private entities, as well as, local, state, and Federal departments and agencies. Additionally, Mr. Shaw managed the Asbestos-In-Schools (AHERA) Program on behalf of the State of North Carolina, among other compliance and regulatory duties, as a State employee within the DHHS-DPH-Health Hazards Control Unit. Mr. Shaw regularly conducts and coordinates Industrial Hygiene related activities with regard to Asbestos, Lead-Based Paint, Mold, Indoor Air Quality, Polychlorinated Biphenyls (PCBs), Universal Waste & Other Regulated Materials, and Worker Exposure with regard to activity specific hazards.

Education/Certifications/Experience

American Board of Industrial Hygiene: Certified Industrial Hygienist

Class Title

Water Damage, Mold, & Indoor Air Quality

Class Description

This presentation will provide the audience with general knowledge associated with water infiltration into buildings and a discussion as to the effects of water infiltration. Topics such as types of contaminated water and restoration will be covered. Mold will also be discussed and will include types of mold, health effects, mold investigations, industry standards, government guidelines, and regulations. Indoor Air Quality (IAQ) concerns will be discussed which may not be associated with water damaged and mold such as volatile organic compounds (VOCs), formaldehyde, and other factors that may contribute to poor IAQ. The April 2016 AIA White Paper: Materials Transparency & Risk for Architects will be discussed with regard to product disclosure documents review as it pertains to constituents that may affect IAQ.
